

1 Is a particular car on the front lot?

2 Or is it on the back lot?

3 Which section of a lot was this car parked in?

4 Which space was it last parked in?

5 Is a car going for a test drive?

6 Is a car being taken off the lot without permission?

7 Where is that car going? (real-time)

8 Is a car in your service center?

9 Is a car leaving your service center?

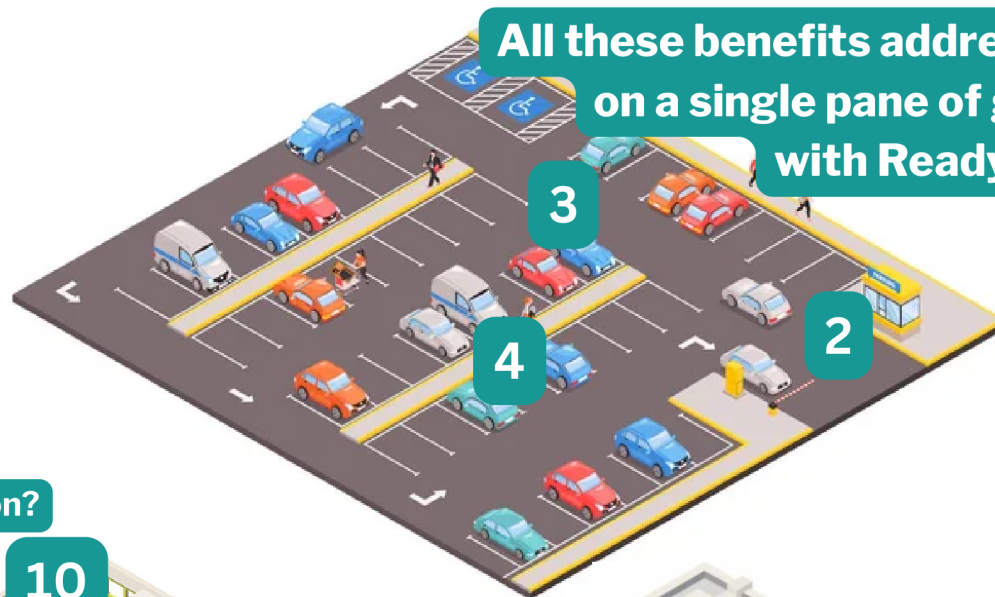

10 Engine codes without a manual check

11 Easier on-site location and maintenance of inventory

12 Potential theft recovery via covert installation

13 Preventative maintenance upsell (separate from theft/inventory)

All these benefits addressed
on a single pane of glass
with Ready IoT!
