Smarter Cold Chain Management starts with Ready Wireless

READY WIRELESS

READY IoT

1. What is the location of my cargo? (Do you need to know where it is?)
2. Do you need real-time reporting and alerting? (Can tie-in w/ battery)
3. Temp zones at the front, middle, and:
4. By the door to account for 'hot spots'
5. Get as granular of temp zones as you want or:
6. Tracking to the pallet level
7. Alerts when reported temps are too hot/ cold
8. How long is the product in transit to the store?
9. Were there pit stops/ power downs?
10. Geofence check-ins along the way
11. Loading door open/ close monitoring
12. Occupancy/ motion detection for help in theft deterrent
13. Preventative maintenance extending forklift battery life

All these insights and alerts on a single pane of glass with Ready IoT!
