

Smart Trash Pickup start with Ready Wireless.

Bin content and status monitoring solutions put comprehensive, actionable insights right at your fingertips to optimize service routes and get more pickups with less miles.

Real-Time Fill Levels For All Your Customers

Gain **unprecedented visibility into waste management** operations with our remote monitoring technology. **Track fill levels and lid open/ close status in real-time**, allowing you to assign emergent pickups to drivers to **always hit your SLA**.

Increase Route Efficiency and Lower Cost

Maximize planned pickup efficiency and driver utilization. Our remote monitoring system ensures optimal bin utilization, preventing overflow and **reducing collection frequency**. By eliminating unnecessary pickups, you can significantly **reduce operational costs and better allocate resources**.

Liquids and Solids for Myriad Applications

Streamline your **waste management and liquid filling** operations with remote monitoring. Automate data collection, eliminate manual checking, and **reduce human error**. Identify **current levels and remaining storage space** in a container.

View, Alert, and Report On Demand

Ready Wireless's intuitive dashboard allows you to **check real-time status of any system**. Alerting **tells you when action is needed** without someone sitting behind a screen, and you can **export all your data and API insights to in-house software**.
